www.unh.edu/survey-center

DURHAM, NH – Vermont senator Bernie Sanders continues to lead former Secretary of State Hillary Clinton in New Hampshire and most Democrats think Sanders will win the New Hampshire Primary. However, one third of Democrats say they have not definitely decided who they will support.

These findings are based on the latest **CNN/WMUR New Hampshire Primary Poll**,* conducted by the University of New Hampshire Survey Center. Seven hundred and fifty-one (751) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between February 2 and February 4, 2016. The margin of sampling error is +/- 3.6 percent for the entire sample. Included were two hundred and eighty-seven (287) likely 2016 Republican Primary voters (MSE = +/-5.8 percentage points), and three hundred and twelve (312) likely 2016 Democratic Primary voters (MSE = +/-5.5 percentage points).

NH Voters Still Not Decided

With only days remaining until the February 9 New Hampshire Primary, an increasing percentage of New Hampshire Democrats have decided which candidate they will vote for, however, about a third of voters have not yet firmly committed to a candidate. Currently, 64% of likely Democratic primary voters say they have definitely decided who they will support, 20% are leaning toward a candidate, and 16% are still trying to decide who to support.

* We ask that this copyrighted information be referred to as *the CNN/WMUR New Hampshire Primary Poll*, sponsored by WMUR-TV and CNN, and conducted by the University of New Hampshire Survey Center.

Currently, 55% of likely Democratic primary voters say they are extremely interested in the election, 37% are very interested, 8% are somewhat interested and 1% are not very interested. Interest is similar to this point in the 2008 primary cycle when 52% of Democrats said they were extremely interested in the election, 38% were very interested and 13% were somewhat or not very interested.

Undeclared voters, often erroneously referred to as “independents”, are just as likely to say they plan to vote in the Republican primary as the Democratic primary. Currently, 46% of undeclared voters say they plan to vote in the Democratic primary, 46% plan to vote in the Republican primary, and 9% are unsure which primary they would vote in.

2016 NH Democratic Primary Trial Heat

Senator Sanders has maintained his considerable lead over Clinton in New Hampshire. If the Democratic Primary were held today, 61% of likely Democratic Primary voters say they would vote for Sanders, 31% say they would vote for Clinton, and 8% are undecided.

Sanders leads Clinton among nearly every demographic group. His strongest support comes from voters under 35 (87%), registered undeclared voters (69%), and voters who have not previously voted in a primary (81%). The trouble for the Sanders campaign is that younger voters and first-time primary voters are the least likely to show up on election day. Clinton’s strongest support comes from voters who are 65 and older (45%). Sanders also leads Clinton 66%-34% among voters who say they have definitely decided who they will support.

There continues to be a large gender gap with Sanders leading among men by 46 percentage points (71% to 25%). Sanders also leads over women by 19 percentage points (54% to 35%).

Most Unpopular Democrat Candidate

Nominations typically go to candidates who are acceptable to most members of their party and are less polarizing and none of the Democratic candidates are seen as particularly unacceptable. When asked which candidate they would NOT vote for under any circumstance, 18% would not vote for Clinton, 7% would not vote for Sanders, 55% think that all of the prospective candidates are acceptable, 8% named someone else, and 11% are unsure.

NH 2016 DEM Presidential Primary -- Would Not Vote For

Democrat Net Electability

Sanders continues to be the most popular Democrat as measured by net electability, the percentage who support a candidate minus the percentage who would not vote for that candidate under any circumstances. Sanders' net electability score is +54%, while Clinton's net electability score is +13%.

NH 2016 DEM Presidential Primary -- Net Electability Ratings

Who Will Win NH Primary?

Sanders' leads in polls have led most Democratic Primary voters to believe he will win the New Hampshire Primary – 62% of likely Democratic Primary voters think Sanders will win the New Hampshire primary, 24% think Clinton will win, and 14% were unsure.

CNN/WMUR New Hampshire Primary Poll Methodology

These findings are based on the latest CNN/WMUR New Hampshire Primary Poll, conducted by the University of New Hampshire Survey Center and funded by CNN and WMUR-TV, Manchester, NH. Interviews were conducted by the UNH Survey Center with assistance from the Center for Public Interest Polling in Eagleton Institute at Rutgers. Seven hundred and fifty-one (751) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between February 2 and February 4, 2016. If a household included more than one adult, the adult who had the most recent birthday was selected to be interviewed.

The margin of sampling error is +/- 3.6 percent for the entire sample. Included were two hundred and eighty-seven (287) likely 2016 Republican Primary voters (MSE = +/-5.8 percentage points), and three hundred and twelve (312) likely 2016 Democratic Primary voters (MSE = +/-5.5 percentage points). These MSE's have not been adjusted for design effect. The design effect for the survey is 1.1%.

The random sample used in the CNN/WMUR New Hampshire Primary Poll was purchased from Marketing Systems Group (MSG), Horsham, PA. MSG screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the CNN/WMUR New Hampshire Primary Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
